Smart Rail Travel

▶ Old fashioned commuter rail passes have been replaced by Suica smart cards by Japan's largest rail East, and since their introduction in November last year, more than 3.6 million out of 4.5 million pass use them. The cards work by passing the card over a smart card reader, not that much different from i fashioned ticket with a magnetic strip into a machine. The big difference is that the card can be "charg Yen, around 70 Euros, which means that the commuter does not, for example, have to stand in an exc Instead, the fare difference is automatically deducted from the card when the holder waves the card o

Suica cards are seen as "cool" by many younger Japanese travellers, and, as DoCoMo's i-mode mobi is quite easy to extract very small amounts of money where micropayment systems are in operation. S for the Suica cards to be set up for use in supermarkets and convenience stores, where small financia traditionally take place.

Smart cards as cash are not yet in widespread use. But Japan may well find itself ahead of the game,l Rail East expects virtually all of its passengers to have converted to the new technology by the end of
